Dear investors!

Welcome to our hospitable region!

Kuzbass is known as the largest coal and metallurgical region of Russia, as one of the main industrial centers of the country.

However, we are doing a lot to make Kuzbass not only a region of large coal and large metal, but also a region of developed agriculture, exciting year-round tourism, science and culture.

Our region has great potential and a set of competitive advantages for economic activity. In Kuzbass, within the boundaries of three single-industry towns: Anzhero-Sudzhensk, Novokuznetsk and Jurga, created and began to operate the territory of advanced socio-economic development (TOSER). The city of Jurga became the first TOSER, the government decree on the establishment of which was signed in July 2016.

The second TOSER was established in September 2016 in Anzhero-Sudzhensk. Third ASEZ was established in March 2018 in the city of Novokuznetsk. Toser residents are provided with Federal, regional and local tax benefits. Also on the territory of the region there is an economic favored zone – tourist and recreational type "Mountain Shoria", residents of which are provided with regional tax benefits.

Coal chemical, biomedical, agro-industrial and tourist-recreational clusters are actively developing.

To help investors, a regional "Agency for attracting and protecting investments" was created. Its task is to promote the potential of Kuzbass at the interregional and international levels, attract investment and support investment projects on the principle of "one window". The Agency provides its services free of charge. With the assistance of the Agency, the Kuzbass investors Club was established in 2016, which is a platform for the exchange of information between entrepreneurs, investors and the government.

Ensuring a favorable investment climate and supporting projects are constant priorities of our investment policy.
